**Declaration**

I declare that this research project is my own work. It is being submitted in fulfilment of the requirements of the Degree Masters of Social Work by Research. The research has not been submitted before any degree or examination in any other universities and all references have been duly acknowledged.

## **Dedication**

I dedicate this work to my late brother Irvine. Your passing away was a great pain to me and a source of inspiration to do this thesis, regardless of the numerous setbacks.

## **Acknowledgements**

I would like to express my sincere gratitude to:

- \* Grace Khunou (PhD), my supervisor, for all the support, guidance, encouragement, advice and patience
- \* Elna McIntosh (PhD) for the numerous opportunities she afforded me, plus great encouragement
- \* All the participants who offered their time to participate in this research
- \* My siblings for the social support and encouragement
- \* My friends and colleagues

Thank you all for the support you have given me unconditionally.

## **Abstract**

Men are often characterised by a general unwillingness to seek help when experiencing problems in life. Popular stereotypes portray men's reluctance to ask for direction when they are lost, having difficulty sharing vulnerable feelings with friends, and avoiding seeking help from professionals. These stereotypes raise an important question of whether men are able to take care of their health; that is, reporting and subsequently seeking early treatment for chronic diseases. This study therefore inquired into men's perceptions on reporting and getting treated for prostate cancer as well as the change in their identities upon treatment. The study adopted a qualitative approach and explored men's health help-seeking practices through in-depth interviews. Twenty male participants in Gauteng were recruited for the study via purposive sampling. The data collected were analysed using thematic content analysis. Findings from this study point out the complexities in men's health practices and the eminent threat to manliness that often goes unabated, reducing men's choices to disregard their sexuality over surgery. Findings from the study continue to point out other things that have somewhat been ignored in literature. For instance, the type of disease or condition influences whether it is to be reported or not. In this case, diseases of a sexual nature carry a lot of stigma, compounded by the attitude of nursing staff in public health facilities, men choose to only seek help when they have no choice. The ramifications often go beyond personal into interpersonal relationships and therefore it is useful for social work professionals to integrate understanding of masculine norms and stereotypes into an analysis of men's use of health services.

*Key words:* Masculinities, men's health, health-seeking behaviour, prostate cancer

Abstract	iv
<b>Chapter 1: Background of study</b>	
<b>1.1 Introduction</b>	<b>1</b>
<b>1.2 Research questions</b>	<b>5</b>
<b>1.3 Aim of the study</b>	<b>5</b>
<b>1.4 Objectives of the study</b>	<b>5</b>
<b>1.5 Brief chapter synopsis</b>	<b>6</b>
<b>Chapter 2: Literature Review</b>	
<b>2.1 Introduction</b>	<b>9</b>
<b>2.2 Masculinity and Health</b>	<b>9</b>
<b>2.3 Masculinity and health help-seeking behaviour</b>	<b>14</b>
<b>2.4 The genesis of men's health practices in Africa</b>	<b>17</b>

<b>2.5 Defining men's health</b>	<b>20</b>
<b>2.6 Masculinities and prostate cancer</b>	<b>23</b>
<b>2.7 The status of men's sexual health</b>	<b>25</b>
<b>2.8 Theoretical framework: Person-in-situation</b>	<b>30</b>

### **Chapter 3: Research Design and Methodology**

<b>3.1 Introduction</b>	<b>33</b>
<b>3.2 Research Design</b>	<b>33</b>
<b>3.3 Population and Sampling Procedures</b>	<b>34</b>
<b>3.3.1 Population</b>	<b>34</b>
<b>3.3.2 Sampling</b>	<b>36</b>
<b>3.4 Pretesting the interview</b>	<b>38</b>
<b>3.5 Research site</b>	<b>38</b>
<b>3.6 Data collection</b>	<b>39</b>
<b>3.7 Data analysis</b>	<b>48</b>
<b>3.8 Ethical Consideration: Experiences from the field</b>	<b>49</b>
<b>3.9 Strengths &amp; Limitations</b>	<b>51</b>

### **Chapter 4: Pathogenesis of prostate cancer**

<b>4.1 What is Prostate cancer?</b>	<b>53</b>
<b>4.2 Signs and symptoms</b>	<b>53</b>
<b>4.3 Tests to Identify Prostate Cancer Stage</b>	<b>55</b>
<b>4.4 Reactions to diagnosis methods</b>	<b>56</b>
<b>4.5 Prostate cancer treatment</b>	<b>57</b>
<b>4.6 Major issues in prostate cancer treatment</b>	<b>62</b>

## **Chapter 5: Complexities pertaining to the diagnosis of prostate cancer.**

<b>5.1Introduction</b>	<b>67</b>
<b>5.2 Context</b>	<b>68</b>
<b>5.3 Treatment/ management of prostate cancer become very expensive.</b>	<b>72</b>
<b>5.4 Limited awareness of the disease</b>	<b>74</b>
<b>5.5 Prostate Cancer Management and Dying</b>	<b>79</b>
<b>5.6 Conclusion</b>	<b>83</b>

## **Chapter 6: Psychological Effects of Prostate Cancer on Survivors**

<b>6.1 Introduction</b>	<b>85</b>
<b>6.2 Fear and anxiety at initial diagnosis</b>	<b>85</b>
<b>6.3 Depression and delayed treatment</b>	<b>90</b>

<b>6.4 Reactions to prostate cancer treatment</b>	<b>96</b>
<b>6.5 Conclusion</b>	<b>109</b>
<b>Chapter 7: Conclusion and Recommendations</b>	
<b>7.1 Conclusions</b>	<b>111</b>
<b>7.2 Recommendations</b>	<b>115</b>
<b>7.3 Recommendations for further research</b>	<b>116</b>
